

Realtime Rostering

Safer, fairer rosters that improve patient care

Do you find yourself spending too much time on administration?

Is it difficult to keep track of your staff and manage complicated rotas?

Are you concerned about your spend on Bank and Agency staff?

If you answered, “yes” to these questions, our newly updated Realtime Rostering system is definitely for you. Here’s everything you need to know as you make the move!

Why should we choose e-rostering?

Choosing to roster electronically not only saves time, it is also more efficient as the system enables staff to clearly identify gaps in the rotas and plan ahead accordingly. All information is saved online and can be accessed at any point.

Is it easy to use?

In a word, yes! We have put all of our knowledge into the updated system to make rostering simple, and we’ll also be on hand to provide training and help with the process.

What is Realtime Rostering?

A new, accurate and efficient way to organise your workforce and their shifts from one computer screen. All your staff information will be in one accessible place so you can easily see gaps in shifts that need filling without having to sift through mountains of paperwork.

Why should I get Realtime Rostering instead of a different system I’ve seen?

Skills for Health is a Not for Profit organisation and trusted provider of healthcare and medical e-rostering solutions throughout the UK and we really go the extra mile when it comes to support; we won’t just throw you in at the deep end!

Will it be straightforward to change over from my current system?

We’ll help you get your house in order when you change over to Realtime Rostering – making sure you understand how everything works and how best to use the new system for your organisation.

Our bespoke Data Migration Plan and friendly implementation team will ensure that the changeover to the new system is as easy and seamless as possible.

Is it good value for money?

With our Realtime Rostering system, what you see is what you get and there are no hidden costs.

However, we strongly believe that it’s not just about our product it’s about the full service we offer; we’ll be with you every step of the way, from changeover and training in the new system to solving teething problems and queries.
